

New five year MOU for Sea Cadets

I am delighted to announce that we have completed a renewal of our Memorandum of Understanding (MOU) with the MOD. This together with a new Partnering Charter reaffirms the strong relationship between the Sea Cadets and the Royal Navy and sets out the basis for this over the next five years.

The MOU has been greatly improved, with the inclusion of an Accounting Officer role in respect of Grant in Aid monies, clarification of the on-going support, including use of facilities and a set of strategic objectives against which to measure our continued successful delivery of the organisation.

In a period of considerable flux for the Royal Navy and MOD the time and effort applied to this renewal at the highest levels is impressive and a clear demonstration of the level of support and confidence in the Sea Cadets. It is of course also testament to the work of the Sea Cadets in inspiring young people through fun and adventurous nautical activity and the traditions and ethos of the Royal Navy to learn new skills and gain a head start in life.
